safehosts

Professional services

Whether you simply don't have time to fix your colocated or hosted servers yourself, you need to migrate to a new environment or operating system or you'd like to discuss technical solutions to other business challenges, our Professional Services team is ready to help.

Sometimes we all need the benefit of a capable pair of hands to help out when it matters most. Perhaps your IT resource is busy on other tasks and you simply can't spare them, or you need to migrate systems and really want the backup of an expert team.

Our team of technical experts and engineers operates our data centre day-in, day out, and thinking on their feet to remedy faults and solve challenges is second nature.

› **Expert team with years of experience fixing issues and solving challenges**

› **Works carried out to strict controls for quality and time**

› **Gives you space and headroom to concentrate on running your business**

› **Per hour or per project pricing**

How Professional Services will benefit your business

Expert team with years of experience. We've been operating our data centre since 2009, so when it comes to server maintenance we're an undoubted pair of safe hands.

Gives you space and headroom to concentrate on running your business. If you can't get to our data centre, or in-house skills can't be spared, give us a call and we'll keep your business up and running.

Works carried out to strict controls for quality and time. We're ISO accredited for quality and information security, and take your deadlines equally seriously so you can rely on us when it matter most.

Per hour or per project pricing. From one-off fixes to bigger projects, our straightforward pricing makes sure your needs are met at a reasonable cost, without any unpleasant surprises.

Our difference

Since 2009, we've been providing safe, secure and accessible Colocation and hosting services from our Cheltenham data centre, helping both service providers and end users achieve increased security and cost savings for their hosted data and applications.

Our technicians have decades of combined hosting and IT experience, so you can feel confident in our ability to fix server issues and handle migrations and bigger IT projects.

We're ISO 9001 and 27001 accredited. We're also flexible and easy to work with and we know that one size doesn't always fit all; we thrive on finding creative solutions to problems that other providers can't solve.
