

Leased lines

Our multi-carrier Leased line options keep you always connected with your hosted data and applications. Backed up with SLAs and great customer service, our Leased lines give you dedicated connectivity you can rely on.

Leased lines give you the best technology available in your area, from Fibre Ethernet to EoFTTC, giving you with fully uncontended symmetrical bandwidth.

Our multi-carrier network provides extensive UK coverage and scalable options to suit every need and budget.

- › **99.999% SLAs**
- › **Wires only so you can simply “plug and play”**
- › **Additional failover options on Ethernet including 4G**

How Leased lines will benefit your business

Boosted productivity. Optimise your business for flexible working; handle high-bandwidth usage such as VoIP, video conferencing and accessing hosted data with ease.

Total control and flexibility. Monitor usage and performance and plan ahead for busy periods or seasonal peaks by increasing bandwidth on demand.

Guaranteed consistency. Industry-leading SLAs and optimum fix times guarantee resilience and reliability at the speeds your business demands.

Always-on support, tailored to you. Friendly and personal account management and unscripted UK-based technical support whenever you need it.

Our difference

Since 2009, we've been providing safe, secure and accessible Colocation and hosting services from our Cheltenham data centre.

Alongside this, we provide robust and secure data connections that keep our customers, both service providers and end users, connected with their data and applications.

Our multi-carrier options provide both resilience and cost savings, while our SLAs and customer service provide peace of mind that you're in safe hands.

We're also flexible and easy to work with and we know that one size doesn't always fit all; we thrive on finding creative solutions to problems that other providers can't solve.

Pricing
